EDUCATION

University of Massachusetts Boston

Boston, Massachusetts

B.S. in Computer Science

Expected May 2027

Relevant Coursework: Applied Machine Learning, Software Engineering, Database Management, Computer Security, Advanced Data Structures & Algorithms, Discrete Mathematics

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, SQL, HTML/CSS

Frameworks: FastAPI, Flask, Node.js, React, React Native, Expo, Streamlit

AI / ML: RAG Pipeline Design, Prompt Engineering, LLM Evaluation, Hybrid Retrieval, Feature Engineering, A/B Testing

Libraries: PyTorch, scikit-learn, XGBoost, Sentence-Transformers, Pandas, Three.js

Databases: ChromaDB, FAISS, Firebase, SQLAlchemy, SQL

Tools: Git, GitHub, Docker, Gmail API, Gemini, Ollama, Metasploit, Aircrack-ng

Cloud & Infrastructure: Vercel, Docker, Hugging Face Spaces

PROJECTS

Interactive Avatar Chatbot [[Demo](#)] [[GitHub](#)] | *React Native, Firebase, Gemini, Three.js*

February – June 2026

- Collaborated with a UMass Boston professor to build a **multilingual mindfulness app** for older Korean adults; implemented **Firebase auth**, Gemini-powered chat flows, and session-aware avatar interactions.

Ez-Ride [[Demo](#)] [[GitHub](#)] | *Streamlit, Gemini, BM25, FAISS*

April – May 2026

- Built a **transportation RAG assistant** for UMass Boston campus transit questions using **hybrid BM25 + FAISS** retrieval, Gemini generation, and source-grounded evaluation to improve answer relevance.

AI Sustainable Labs [[Demo](#)] [[GitHub](#)] | *Flask, Gemini, ChromaDB, BM25, Sentence-Transformers*

February – May 2026

- Built a **public- and donor-facing RAG chatbot** for the UMass Boston Sustainable Solutions Lab with **hybrid** retrieval, streaming responses, and evaluation dashboards to monitor answer quality and regressions.

F1 Race Strategy Predictor [[Demo](#)] [[GitHub](#)] | *XGBoost, scikit-learn, FastAPI, React*

December 2025 – March 2026

- Predicted F1 race outcomes with **blended XGBoost and scikit-learn models** trained on historical race, qualifying, tyre, and weather data; deployed via **FastAPI + React** with automated retraining scripts.

AI Prompt Engineering Research [[Demo](#)] [[GitHub](#)] | *Python, Gemini, Hugging Face*

February 2026

- Designed an **abstract-generation evaluation workflow** using chain-of-thought, few-shot, and structured-output prompting in Gemini; scored outputs via **preference-rate and rubric-based metrics** on Hugging Face.

Email Expense Tracker [[Demo](#)] [[GitHub](#)] | *FastAPI, Gmail API, Ollama, SQLAlchemy*

October 2025 – January 2026

- Automated **receipt parsing from Gmail** using LLM extraction and SQLAlchemy-backed storage; built Firebase session handling and **resilient API fallback logic** for reliable personal finance tracking.

EXPERIENCE

Gyu-Kaku Japanese BBQ

Boston, MA

Server

July 2024 – Present

- Serve **40+ guests per shift** averaging **\$1,200 in sales**, maintaining strong communication and multitasking under high-volume pressure.

VietAID

Boston, MA

Youth Leader

July – Sept 2022

- Designed and administered **mental health surveys** for **200+ Boston Public School students**; analyzed the data and presented findings to school officials.

VITA Program

Boston, MA

IRS-Certified Tax Preparer

Sept 2021 – May 2023

- Assisted **30+ low-income families** with accurate federal tax return preparation and filing.
